TURNING
INNOVATIVE
TREATMENT
IDEAS
INTO
REALITY

At Navigate, we enable innovative treatments through integrated laboratory services to improve and expedite the clinical trial process—aiming to increase your probability of success. We take on complex issues, utilizing our deep scientific knowledge, diversity of experience, adaptability and regulatory success to design customized offerings that help bring new treatments to market faster.

Navigate BioPharma is a specialty laboratory offering high quality, innovative and differentiated precision medicine solutions for drug development and diagnostic applications. Our deep scientific knowledge in diagnosis, disease monitoring and the immuno-oncology field—including CAR-T cell therapy—gets our clients the data they need. With end-to-end services customized for each client, we take a consultative and comprehensive approach to deliver accurate and actionable information in an effort to improve treatment outlook for clinical trial subjects.

We are Pioneers: We do more than just run tests and return results. We go where others do not, providing consultation and direction that breaks new ground.

We are Partners: We truly collaborate with our clients to achieve a shared goal.

We are Pathfinders: We identify an efficient and effective way forward to support drug development.

Our Services

Navigate BioPharma is a specialty laboratory offering high quality, innovative and differentiated precision medicine solutions for drug development and diagnostic applications. With deep scientific knowledge and end-to-end services customized for each client, we take a consultative and comprehensive approach to deliver accurate and actionable information in an effort to improve treatment outlook for clinical trial subjects.

Genomics

With significant technical know-how, a skilled laboratory team and a broad range of framework assays covering multiple technology platforms, Navigate has the ability to meet your genomic testing needs.

Digital Pathology

Navigate offers a broad range of cIHC/ fIHC assays to fit your specific needs for protein biomarker analysis. Our available panels cover immune cell checkpoint expression and lymphoid/myeloid subset analysis and we can validate custom panels to meet your needs.

Flow Cytometry

Navigate is the go-to laboratory for high-complexity flow cytometry analysis. We offer a broad range of panels for biomarker and clinical endpoint analysis in investigational clinical trials including MRD, RO, PK and PD.

Ligand Binding

Our ligand-binding offerings can detect proteins at the lowest possible levels and provide options for non-invasive diagnostic applications. These ultrasensitive immunoassays cover multiple therapeutic areas including oncology, neurology, cardiology, inflammation and infectious disease.

Study Management

Our end-to-end services go beyond testing to help you develop drugs faster and more efficiently. With experienced study managers who serve as your single point of contact, we are available for support whenever you need it, day or night.

Project Management

We assign a dedicated project manager to each study, who is responsible for overall study management, documentation, communication plans, timeline planning and budget adherence.

Data Management

With Navigate's data management services, we are able to design data transfer specifications customized to your needs ensuring compliant data transfers—including reconciliation and remediation requests—from our validated, 21 CFR Part 11-compliant LIMS.

Specimen Management

Our end-to-end sample management system will ensure that your specimens are handled and maintained in validated temperature-controlled environments for both short and long-term storage.

Logistics

From specimen collection kit validation for a range of temperature conditions to centralized kit inventory monitoring and life cycle management, our team will ensure timely sample shipment and receipt with an average in-transit time from courier pick-up to arrival at our lab is less than 48 hours for most countries.

The Navigate Difference

Your Trusted Partner

At Navigate, we partner with you to identify the best path forward for drug development—and solve the most complex issues that prevent and delay new treatments.

Diversity of Expertise

The Navigate team is comprised of experts, specialists, PhDs and MDs who possess advanced scientific knowledge and offer superior application of complex technologies across a variety of services.

Adaptability and Flexibility

Navigate can design custom assays and configure our systems to meet your specific needs. From quick testing turnarounds to tailoring unique data specifications, our flexibility helps drive results faster and more efficiently.

Dependability

With an established history and a reputation for solving our customers' most complex problems, you can count on Navigate. We are truly pioneers, partners and pathfinders.

Technology Agnostic

We utilize multiple diagnostic platforms, not a single solution, and are open to using any technology that will get the job done right.

Quality Assurance

Quality is of the utmost importance at Navigate. Every associate is committed to providing the highest quality service and our quality systems are designed to comply with applicable federal, state and local laws and regulatory requirements including CLIA, CAP, GCP/GCLP, GMP and QSR.
